SUMMARY

Revenue and order volume have moved largely in sync over the past 12 months, with both peaking in September 2025 (€821,040, 452 orders) and showing consistent monthly figures generally between €650,000 and €820,000. There is a notable dip in May 2026, recording only €143,585 in revenue and 90 orders, but this likely reflects an incomplete month rather than a true decline. Overall, the trend shows a relatively stable business with no sustained upward or downward movement across the period.
